

Managed File Transfer for Healthcare

Empowering Hundreds of Healthcare Organizations Around the World to Externally Transfer Sensitive Data Securely and Compliantly

Progress's Managed File Transfer (MFT) Solution, MOVEit, enables healthcare organizations to deliver scalable, secure and compliant patient care and business services. Whether you are looking to secure your electronic Protected Health Information (PHI) in order to comply with HIPAA/HITECH data protection mandates, or you want to on-board new patient services, Progress MOVEit can help.

The adoption of Electronic Health Record (EHR) systems by healthcare organizations has dramatically increased the volume of sensitive data that needs to be exchanged with external vendors.

Protecting PHI Data is Critical

COMPLIANCE

Failure = big fines

REPUTATION

Failure = lost business & damaged brand

PATIENT TRUST

Failure = costly lawsuits

Is Your Sensitive Data Safe?

Multiple Servers = exposure to unencrypted data

Home Grown Scripts = reduced end-to-end visibility; programming errors could result in data ending up in unauthorized hands

Insecure Legacy FTP Servers = unencrypted data and malicious attacks by hackers or spyware

What Makes MOVEit such a Powerful MFT Solution?

SECURITY

Protect sensitive data from being manipulated or ending up in the wrong hands.

- › Encryption (In-Transit and at Rest)
- › Data Integrity Checks
- › Non-Repudiation

COMPLIANCE AND AUDITABILITY

Secure against data loss/tampering to assure regulatory compliance (HIPAA, HITECH, PCI, etc)

- › AES 256-bit Encryption of Files at Rest
- › Tamper-Evident Audit Logs and Reporting
- › No Data Loss

AUTOMATION

Schedule tasks to streamline business operations.

- › Customize Based on Your Business Processes
- › Save Time On-Boarding New Vendors
- › Quick Turnaround for SLAs

CONTROL AND END-TO-END VISIBILITY

Know where your data is and who is accessing it.

- › Administrative Controls and Policy Management
- › Guaranteed Delivery
- › Alerts and Dashboards

RELIABILITY

Flexible and scalable architecture to adapt to growing business needs.

- › High Availability Architecture
- › Scalable for Improved Performance
- › Zero Downtime with Disaster Recovery

Progress MOVEit
for Healthcare

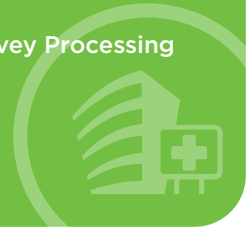

Advantages for Healthcare Organizations

- › **Improved Customer Experience**
Better customer service and service quality by streamlining business processes.
- › **Business Expansion with Value Added Services**
Quickly on-board new healthcare service providers and accelerate the roll-out of competitive services such as patient retrieval of medical records.
- › **Reduced Complexity**
A centralized solution that enables IT to directly manipulate files within the transfer workflow and communicate with any FTP protocol your vendor may have.
- › **Effectively Adhere to SLAs**
Meet business demands on time, every time; automate file transfer configurations for high volume B2B data exchanges with guaranteed delivery features.

Why MOVEit for Healthcare?

The Progress MOVEit MFT Solution enables IT operational efficiency for large batch transactions for a number of different use cases:

- › Streamline the Medical Billing Process
- › Quickly Verify Patient Insurance Coverage
- › Improve HCAHPS Survey Processing

MOVEit Managed File Transfer Solution Offerings

MOVEit Transfer

- A secure repository for sharing critical business data with external parties
- On-premise or Cloud (SaaS) deployment options
- Enable a compliant workflow for exchanging sensitive files

MOVEit Automation

- Push or pull files to/from any FTP, Unix, email or file server
- Schedule data workflows to align with critical business operations
- Develop tasks and workflows without the need for advanced programming skills

MOVEit Analytics

- Advanced monitoring and reporting of all file transfer activities
- Centrally manage workflow, file transfer, security and audit activity
- Simplify audits with custom reports or over 50 out-of-the-box templates

MOVEit Gateway

- Ensures no data is stored in the DMZ
- Inbound connections from the public network are terminated in the DMZ
- Provides a multi-layered security framework to comply with internal security and compliance policies within heavily regulated industries

MOVEit Failover

- Manage File Transfer activities with zero downtime and no data loss
- Ensure 24/7 continuous operations with no single point of failures
